

GENDER PAY GAP REPORT 2017

The Bishop Anthony Educational Trust (BAET) as an employer is required by law to carry out Gender Pay Reporting under the Equality Act 2010 (Gender Pay Gap Information) Regulations 2017, to demonstrate how large the pay gap is between our male and female employees.

We publish these results on our own website by 31st March each year. We use these results to assess:

- the level of gender equality in our workplace
- the balance of male and female employees at different levels

The overall gender pay gap is defined as the difference between the mean (average) or median (actual midpoint) hourly rate of pay of male and female employees.

The results of these statutory calculations are:

1. Mean Gender Pay Gap

The difference between the mean hourly rate of pay that male and female full pay relevant employees receive is 26.39%.

2. Median Gender Pay Gap

The difference between the median hourly rate of pay that male and female full pay relevant employees receive is 12.00%.

3. Mean and Median Bonus Gap

BAET does not pay bonuses to its' employees.

4. The Proportion of males and females in each Quartile Pay Band

As displayed in the following table, BAET has a much higher proportion of women in all quartiles.

Gender	Lower Quartile	Lower Middle Quartile	Upper Middle Quartile	Upper Quartile
Female	86.92%	90.65%	86.92%	79.44%
Male	13.08%	9.35%	13.08%	21.50%

Supporting Statement

BAET is committed to the promotion of equality of opportunity and choice for employees and supports the fair treatment of all staff irrespective of gender through our transparent recruitment processes, pay policy and professional development. All our posts are aligned to nationally agreed pay scales and our male and female staff are paid within the same pay band for the same job role.

The Gender Pay Gap is a high level, non-adjusted indicator of male and female earnings which is affected by workforce distribution and workforce make-up.

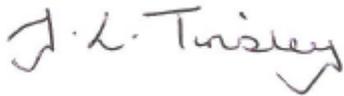

The majority of staff are in the lower pay quartiles and the workforce is predominantly female therefore the gap between the 'average' female hourly rate of pay and the 'average' male hourly rate of pay is significantly affected.

The overall pay gap reflects workforce composition rather than pay inequalities.

Declaration:

I confirm that the above information has been prepared from our payroll data on the snapshot date and fairly represents the Gender Pay Gap information for the Bishop Anthony Educational Trust.
